The essentials of imaging

# magicolor 2590MF

Your compact total office solution

Multifunctional colour workgroup printer 5/20 ppm

magicolor 2590MF

# The compact **all-in-one**

Integrate the magicolor 2590MF into your office space with ease and confidence – knowing that you have the ultimate business device, all in a single compact unit. It combines sharp colour printing, easy document handling and scanning, as well as faxing and copying. Smart professionals will appreciate the full range of functions, high productivity and cost-efficiency.

## ➔ **One compact office unit that does it all**

Cover all your office requirements with a single device – and without compromise. Print, copy, scan and fax; all the essential functions are included in the magicolor 2590MF so you save time and money. There's only one machine to monitor, maintain and order supplies for. Extremely compact, it can be smoothly incorporated into the smallest office spaces or sit close next to you on your desk.

## → Print and copy like a pro

With the magicolor 2590MF you can handle all your printing and copying needs in-house, and be assured that you get a professional quality outcome while eliminating the cost of outsourcing. When colour printing is required for professional visual impact, this machine delivers razor-sharp picture quality at a copy and print speed of 5 ppm at 2400 x 600 dpi. In monochrome you can rely on a print and copy speed of 20 ppm to get the job done in the least time possible.

## → Scan and fax like a specialist

Optimise document handling, data sharing and archiving by converting paper documents and images into digital files with PaperPort SE software. Scan your documents (TWAIN and WIA protocol supported), save them as JPEG, TIFF or PDF and insert them right into your selected application (e.g. Word®, Powerpoint®, Excel®) or attach it directly into an email with smooth SMTP authentication. Just use the LinkMagic software to manage scanning (up to Legal size) on your PC (via USB) – and give your paper documents a new ‘digital’ lease of life. The OCR (optical character recognition) feature converts scanned documents into editable text you can use again and again. As a fax the magicolor 2590MF provides ECM/Super G3 capability, which allows you to send and receive documents at up to 33.6 Kbps with MH/MR/MMR/JBIG compression support.

## → Print photos direct

Connect your PictBridge-compliant digital camera to the magicolor 2590MF’s PictBridge input, and immediately print beautiful photo prints without the need for a PC. Convenient functions let you manage and edit your photos right from your camera.

## → Manage smoothly with flexible paper options

Brochures, presentations and promotional materials are a cinch to produce with the automatic duplex unit which saves time and reduces paper costs. Commercial quality and efficient printing is now within reach! For easy copying and scanning, the standard 50-sheet automatic document feeder does the job while you attend to other matters. Easily print envelopes, stationary and mailing labels by using the dedicated tray which retains their smooth and crisp appearance. The large paper capacity, up to 700 sheets, means high volumes of prints can be made without frequently loading paper.

## → Operate with ease

Streamline your fast-paced office operations with the user-friendly, yet extremely smart, features of the magicolor 2590MF. Standard 128 MB onboard memory makes for fast action and reaction. 10/100BaseT Ethernet and USB 2.0 ports provide flexible office connection options. The one-touch control panel allows you to customise print jobs. Dedicated colour/monochrome copy buttons provide more cost-effective copying, and you can monitor your consumable and machine status via the display. Maintenance from a distance is a significant asset: with the PageScope® Web Connection you keep track of paper and toner levels, email configuration, network and fax settings right on your PC. Convenient front-panel access to all supplies makes replacing consumables and replenishing paper supplies a breeze.

KONICA MINOLTA

## Technical specifications

<b>Print method</b>	electro photographic dual laser printing system
<b>Print speed (ppm)</b>	5 ppm colour, 20 ppm monochrome
<b>Copy speed continuous</b>	5 cpm colour / 20 cpm monochrome
<b>Resolution</b>	2400 x 600 dpi printing, 600 x 600 scanning
<b>Duty cycle</b>	35,000 pages per month
<b>Memory</b>	128 MB
<b>Standard interfaces</b>	Ethernet 10/100Base TX, USB 2.0 (High-Speed) 'Plug and Play' support

Duplexer supports plain paper only.

The addition of some options, in some combinations may cause the product to become non-compliant. Establishment of new regulations may cause the product to become non-compliant. Energy Star compliance does not represent an EPA endorsement of any product or service. Specifications and accessories are based on the information available at the time of printing, and are subject to change without notice. For the latest information, please visit [www.konicaminolta.eu](http://www.konicaminolta.eu).

The stated life expectancy of each consumable in the printer is based on printing under specific operating conditions such as page coverage for a particular page size (5 % coverage of A4). The actual consumables life will vary depending on the use and other printing variables including page coverage, page size, media type, continuous or intermittent printing, ambient temperature and humidity. For more information about toner life expectancy, visit <http://printer.konicaminoltaeurope.com/tco>
